

Motorcycle Ignition Coil

This ignition coil is designed for motorcycle engines. It provides a strong and consistent spark for optimal combustion and improved engine performance.

Product Overview

High-Performance Ignition Coil

The YDG-004 ignition coil is engineered to provide a robust and consistent spark, ensuring optimal combustion for motorcycle engines. Built for durability, it offers reliable performance even under demanding operational conditions. Its design features secure mounting points and reinforced wiring, facilitating a straightforward installation process for various motorcycle models.

Technical Details

Model Number	YDG-004
System Compatibility	CDI, Standard Ignition Systems

Construction

Key Features

- Durable housing for long-lasting reliability
- Robust wiring architecture
- Secure mounting points for easy installation
- Optimized for consistent spark generation
