

Motorcycle Ignition Coil

This ignition coil is designed to provide a strong spark for efficient combustion in motorcycle engines, enhancing overall performance and fuel efficiency. It is constructed from durable materials to ensure reliable operation in demanding conditions and is designed as a direct replacement for easy installation.

Product Overview

High-Performance Ignition Coil

This high-performance ignition coil is engineered to deliver a strong, consistent spark for motorcycle engines, facilitating efficient combustion and smoother operation. Designed for durability in demanding riding conditions, it helps improve overall engine performance and fuel efficiency. This unit serves as a direct replacement part, ensuring a straightforward and hassle-free installation process for maintenance professionals.

Technical Specifications

Key Features

- High-performance spark output
- Improved fuel efficiency
- Durable construction
- Direct replacement fit

Model Number	AM-IC-013
--------------	-----------

Compatibility	Motorcycle
