

# Motorcycle LED Grid Light Module

This motorcycle LED grid light module enhances visibility. It features a rectangular design with a grid-like pattern of LEDs mounted on a circuit board within a protective black casing.

AM-EF-073

## Product Overview

### High-Performance LED Grid Module

This Motorcycle LED Grid Light Module is engineered for durability and reliable performance in demanding environments. Featuring a robust rectangular design with a protective casing, this component is built to withstand impacts and weather exposure. Its specialized grid-like circuit board layout ensures efficient light distribution, making it an ideal choice for motorcycle lighting and electrical system upgrades.

## Technical Details

Model Identifier	AM-EF-073
Component Type	LED Grid Light Module
Key Features	Weather Resistant, Impact Protection, Easy Installation, High-Density LED Array

## Design and Construction

Form Factor	Rectangular
Casing Type	Protective Black Frame
Mounting	Integrated Mounting Point
