Product Overview

High-Performance Motorcycle Lighting

This high-performance LED headlight bulb is engineered to provide superior road illumination and enhanced visibility for motorcycle riders. Featuring a robust aluminum heat sink, the design ensures efficient thermal management for a longer operational lifespan and consistent brightness. It is built to withstand harsh riding conditions while offering significant energy efficiency improvements over traditional halogen lighting solutions.

Technical Specifications

Core Advantages

- Energy efficient LED chips
- Enhanced beam focus pattern
- Durable construction for harsh conditions
- Easy installation

Thermal Cooling System

Robust aluminum heat sink

Installation Compatibility

Standard motorcycle headlight sockets

Market Availability

Global Distribution

Colombia, Peru, Brazil, Argentina, Bolivia, Guatemala, Uruguay, Paraguay, India, Bengal, Algeria
