

Motorcycle LED Turn Signal Indicator

This high-intensity LED turn signal enhances motorcycle visibility. Its compact design allows for universal fitment and increased safety.

Product Overview

High-Visibility LED Turn Signal

This motorcycle LED turn signal indicator is designed for enhanced road safety and visibility. Featuring a high-intensity LED light source and a durable, transparent lampshade, it provides reliable performance in various riding conditions. The unit is constructed with a flexible, soft rubber housing, offering resilience against impacts and vibrations.

Technical Specifications

Operating Voltage	12 V
Power Type	DC

Design & Construction

Fitment	Universal Fit
Lens Type	Transparent
Housing Material	Soft Rubber

Features

Key Benefits

- High-intensity LED output
- Weather-resistant construction
- Compact design
- Includes mounting hardware
- Flexible rubber housing for durability
