

Motorcycle Lever Assembly with Switchgear

Motorcycle lever assembly integrates switchgear for brake and clutch control. It is designed for handlebar mounting.

Product Overview

Integrated Control Solution

This motorcycle lever assembly provides a streamlined solution for brake and clutch control, featuring an integrated switchgear unit. Designed for handlebar mounting, the assembly includes a durable silver finish and a pre-wired black wiring harness for easier installation. This component is an essential upgrade for maintaining precise control and electrical functionality on compatible motorcycle systems.

Technical Specifications

Application

Brake Control • Clutch Control

Model Identifier

AM-HD-064

Finish

Silver

Key Features

Integrated Switchgear, Handlebar Mount, Pre-wired Harness
