## Product Overview

### Universal Motorcycle Lighting Solutions

This series of motorcycle lighting wire harnesses is designed to support a wide range of global motorcycle models, catering specifically to markets across South America, India, and beyond. These high-quality electrical components ensure reliable power transfer for headlight systems, featuring standardized interfaces for seamless installation and optimal performance. Whether for repairs or lighting upgrades, these harnesses provide the durability and connectivity required for consistent motorcycle lighting functionality.

#### Primary Markets

Colombia, Peru, Brazil, Argentina, Bolivia, Guatemala, Uruguay, Paraguay, India, Bengal, Algeria

## H1 Interface Specifications

#### Interface Type

H1

#### Length

125 mm

#### Diameter

24 mm

## H7 Interface Specifications

#### Interface Type

H7

## 9005 Interface Specifications

#### Interface Type

9005

#### Length

136 mm

#### Diameter

28 mm

## Technical Details

### Connector Specifications

| Interface Type | Length (mm) | Diameter (mm) |
|----------------|-------------|---------------|
| H1             | 125         | 24            |
| 9005           | 136         | 28            |
