

Motorcycle Lithium-Ion Starter Battery, 12.8V

This is a lithium-ion starter battery for motorcycles and specialty vehicles. It has a voltage of 12.8V, a cold cranking amps (CCA) rating of 265 (5 seconds at 25°C), and a watt-hour (Wh) capacity of 48.5.

Overview

High-Performance Lithium-Ion Starter Battery

This advanced lithium-ion starter battery is engineered specifically for motorcycles and specialty vehicles requiring reliable starting power. With a robust 12.8V system, it delivers consistent performance and efficiency compared to traditional lead-acid alternatives. Designed for durability and longevity, this unit ensures your vehicle starts reliably in a variety of conditions.

Technical Specifications

Cold Cranking Amps (CCA)

265 A

CCA (5s @ 25°C)

Voltage	12.8 V
Energy Capacity	48.5 Wh

Application

Compatible Vehicles	Motorcycles, Specialty Vehicles
