

# Motorcycle Magneto Stator Coil Assembly

This magneto stator coil assembly is designed for motorcycle engines. It generates electrical power through copper coils wound around a central core, ensuring reliable battery charging and ignition system performance.

## Product Overview

### High-Performance Magneto Stator

This magneto stator coil assembly is engineered for reliable power generation in motorcycle engines. Featuring precision-wound copper coils on a central core, it ensures consistent electrical output for battery charging and ignition systems. Built to OEM quality standards, this component offers a long service lifespan and durable performance for various motorcycle models.

## Technical Details

### Quality Standard

OEM Quality

### Included Components

- Copper coil windings
- Central core
- Wiring harness
- Electrical connectors

### Durability Features

Lasting Durable, Long Service Lifespan

### Compatibility

Compatible with various motorcycle engine types
