

Motorcycle Main Wiring Harness

Complete main wiring harness assembly designed for motorcycles. This harness includes all necessary wires, connectors, and terminals for a full electrical system integration.

Product Overview

Complete Electrical Integration

This main wiring harness assembly is designed specifically for TM125-5 motorcycles. It provides a comprehensive solution for electrical system integration, incorporating all necessary wires, connectors, and terminals. Built for reliability, this harness features durable insulation and a precise configuration that serves as a direct OEM replacement for seamless installation.

Technical Details

Key Features

- Durable insulation material
- Secure connection terminals
- Precise OEM-matched configuration
- Direct replacement design

Compatibility	TM125-5 Motorcycles
Assembly Type	Main Wiring Harness, Electrical System
