

Motorcycle Radiator Guard

This motorcycle radiator guard is engineered to provide robust protection and maintain optimal airflow. Constructed from high-grade aluminum, it features a durable finish and is compatible with various motorcycle models.

Product Overview

Precision-Engineered Radiator Protection

This high-grade motorcycle radiator guard is designed to offer maximum protection against debris and rock impacts while significantly enhancing cooling performance. Constructed from durable 6061 alloy, it provides up to 50% more durability than standard alternatives. The unique wind tunnel design ensures consistent airflow, maintaining optimal engine temperatures during demanding rides.

Technical Specifications

Design Features

- Wind tunnel design
- Precision-cut lattice pattern
- Reinforced mounting points

Material	6061 Alloy
Durability Increase	50 %
Airflow Improvement	25 %
Finish	Anodized, Blue

Performance Metrics

Core Metrics

50 % Durability vs Standard	25 % Airflow Efficiency Gain
