

# Motorcycle Rear Shock Absorber

This motorcycle shock absorber is designed for rear suspension systems. It ensures a smooth and stable ride across various motorcycle models.

## Product Overview

### High-Performance Rear Suspension

The ST191 rear shock absorber is precision-engineered to provide optimal damping control and stability for motorcycle suspension systems. Designed for durability and consistent performance, this unit ensures a smoother ride by effectively absorbing road impacts. It is a reliable replacement solution compatible with multiple specific part configurations.

## Technical Specifications

Model Identifier	ST191
Production Code	YX-02-137
Application	Rear Suspension, Motorcycle, Replacement Part

## Compatibility

### Compatible Part Numbers

Position	Part Numbers
Rear Right (RR)	48530-2B070, 48530-2B030
Rear Left (RL)	48540-2B070, 48540-2B030
Front Right (FR)	148530-ST191-FR
Front Left (FL)	148540-ST191-FL
