

Motorcycle Rear Shock Absorber

This motorcycle rear shock absorber enhances vehicle stability and ride comfort. It has a 308mm center distance and mounting holes of $\text{Æ}12.1$.

Product Overview

High-Performance Rear Suspension

These high-performance rear shock absorbers are meticulously engineered to enhance vehicle stability and significantly improve ride comfort. Featuring a robust outer casing and a precision-engineered internal damping system, they provide reliable performance across diverse road conditions. The coil spring design ensures optimal suspension response by effectively absorbing imperfections and minimizing vibrations, ultimately leading to improved handling and control for a safer driving experience.

Technical Specifications

Key Features

- Precision-engineered damping system
- Durable robust outer casing
- Optimized suspension response
- Enhanced vibration minimization

Design Type	Coil spring shock absorber
Performance Standard	OEM Compliant, High-Performance

Applications

Compatibility	Suitable for a variety of vehicle applications requiring reliable suspension solutions.
