

# Motorcycle Rear Shock Absorber

This rear shock absorber has a 10.1mm installing hole underneath and 12.1mm mounting holes. It is designed for the JH125L model with a center distance of 394±2.0.

## Product Overview

### High-Performance Rear Suspension

This rear shock absorber is engineered to provide professional-grade vehicle stability and enhanced ride comfort. Featuring a robust construction with an integrated spring and damper system, it ensures superior vibration damping and responsive handling. Designed for versatility, it is an essential component for maintaining consistent performance across various road conditions.

## Performance Metrics

Performance Features	Enhanced Stability, Vibration Damping, Improved Handling, Ride Comfort
----------------------	--

## Design Specifications

### Design & Build

- Robust construction
- Durable spring system
- Advanced damper mechanism

## Compatibility

Application	Suitable for various motorcycle vehicle applications
