

Motorcycle Rear Shock Absorber

This motorcycle rear shock absorber is designed for enhanced vehicle stability and ride comfort. It has a center distance of 348 ± 2.0 and mounting holes of $\varnothing 12$, with an installing hole under of $\varnothing 10.1$.

Overview

High-Performance Rear Suspension

These high-performance rear shock absorbers are meticulously engineered to provide superior vehicle stability and enhanced ride comfort. Featuring a robust cylinder and piston assembly, the design ensures durability and long-term resistance to wear. The advanced damping system offers precise control over suspension movement, effectively reducing body roll and improving overall vehicle handling for a smoother, more controlled driving experience.

Technical Specifications

Engineering Details

- Robust cylinder and piston assembly
- Precisely engineered damping system
- Direct fit replacement design
- Meets or exceeds OEM specifications

Key Performance Benefits

Enhanced Stability, Reduced Body Roll, Improved Handling, Wear Resistance

Compatibility

Installation Type

Direct Fit
