

Motorcycle Rear Shock Absorber 290mm

This motorcycle rear shock absorber enhances vehicle stability and ride comfort. It has a 290mm center distance and $\pm 10\text{mm}$ mounting holes.

Product Overview

Precision Suspension Performance

This 290mm rear shock absorber is engineered to provide superior stability and comfort for various vehicle applications. Featuring a robust coil-over spring configuration, it delivers reliable damping control to ensure consistent handling. The adjustable design allows for customized performance tailored to specific riding requirements.

Technical Specifications

Overall Length	290 mm
Design Type	Coil-over spring
Damping Control	Yes

Features

Construction Quality

Durable Construction • Long-lasting Reliability

Performance Features

Adjustable Damping, High Performance, Enhanced Stability, Coil-over Design
