

Motorcycle Rear Shock Absorber 310mm

This motorcycle rear shock absorber has a 310mm center distance between mounting holes. It is designed with $\text{Æ}12$ and $\text{Æ}10$ mounting holes.

Product Overview

High-Performance Suspension

These rear shock absorbers are engineered for optimal suspension and superior ride comfort. Featuring a durable coil-over spring design, they effectively dampen vibrations and absorb impacts from road irregularities. Designed for stability and enhanced handling, they are an ideal choice for both replacement and performance upgrades.
