

Motorcycle Rear Shock Absorber 310mm

This motorcycle rear shock absorber has a 310mm center distance between the $\varnothing 12$ mounting holes. The installing hole underneath is $\varnothing 10.1$.

Product Overview

High-Performance Rear Suspension

These 310mm rear shock absorbers are engineered to deliver superior vehicle stability and ride comfort. Designed with a durable construction featuring a high-quality chrome finish and a robust coil spring, they provide optimal damping for improved road handling and control. They serve as an ideal replacement component for worn or damaged units, ensuring a safer and smoother driving experience.

Technical Specifications

Component Type

Rear Shock Absorber • Coil Spring Suspension

Length	310 mm
Surface Finish	Chrome

Key Benefits

Key Benefits

- Enhanced vehicle stability
- Improved ride comfort
- Optimal damping performance
- Durable construction
