

Motorcycle Rear Shock Absorber 330mm

This motorcycle rear shock absorber is designed with a 10.1mm mounting hole. It has a center distance of 330mm.

Product Overview

High-Performance Suspension Solution

These 330mm rear shock absorbers are precision-engineered to deliver superior vehicle stability and ride comfort. Built with a robust coil spring and an advanced hydraulic damping system, they effectively neutralize road vibrations and bumps for a smooth, controlled ride. Designed to improve handling and reduce body roll, these absorbers are an essential upgrade for enhanced vehicle safety and performance.

Technical Specifications

Construction Details

- Robust coil spring design
- High-durability materials
- Hydraulic damping mechanism

Overall Length	330 mm
Damping System	Hydraulic Damping

Performance

Performance Benefits

1 High

Stability Enhancement

1 Effective

Vibration Reduction

Applications	Enhanced Suspension, Improved Handling, Reduced Body Roll
