

Motorcycle Rear Shock Absorber 338mm

This motorcycle rear shock absorber has a center distance of 338mm and mounting holes of $\varnothing 12$. The installing hole underneath is $\varnothing 10$ and it is applicable to model JH90.

Product Overview

High-Performance Suspension

This 338mm rear shock absorber is engineered to provide professional-grade stability and improved ride comfort for motorcycles. By utilizing a robust hydraulic damping system and high-durability spring, it effectively reduces road vibrations and enhances vehicle handling. This component is an ideal solution for maintenance or performance upgrades where superior responsiveness and control are required.

Technical Specifications

Eye-to-Eye Length	338 mm
Type	Rear Shock Absorber
Damping System	Hydraulic

Key Features

Performance Benefits	Enhanced Stability, Vibration Reduction, Improved Handling, Hydraulic Damping
