

Motorcycle Rear Shock Absorber

This rear shock absorber is designed for motorcycles, featuring mounting holes of $\text{Æ}10.1 \times 2 \text{lt}$. is applicable to the 350SF model with a center distance of 248 ± 2.0 .

Product Overview

High-Performance Suspension Solution

This premium rear shock absorber is engineered to significantly enhance vehicle stability and overall ride comfort. Equipped with a robust coil spring and an advanced hydraulic damping system, it offers consistent performance across a wide range of driving environments. Designed to effectively minimize vibration and maximize shock absorption, this component ensures a smoother and more controlled driving experience for demanding automotive applications.

Technical Specifications

Component Type	Rear Shock Absorber
Damping System	Hydraulic Damping
Spring Mechanism	Coil Spring

Key Features

Performance Benefits	Enhanced Stability, Reduced Vibration, Superior Shock Absorption, Improved Ride Comfort
----------------------	---

Applications

Compatible Applications

- Automotive Suspension Systems
- Motorcycle Chassis Components
