

Motorcycle Rear Shock Absorber

This motorcycle rear shock absorber is designed with a 10.1mm installing hole underneath and 12.1mm mounting holes. It has a center distance of 255 ± 2.0 mm and is applicable for the JY110 model.

Product Overview

High-Performance Rear Suspension

This rear shock absorber is engineered for professional-grade vehicle stability and enhanced ride comfort. Featuring a robust coil spring design integrated with a high-precision hydraulic damping system, it offers superior road vibration reduction. It serves as an ideal solution for replacing worn suspension components to restore optimal handling and responsiveness.

Technical Specifications

Core Features

- Hydraulic damping mechanism
- Durable coil spring assembly
- Vibration isolation technology
- Improved handling responsiveness

Performance Benefits

Enhanced Stability • Superior Control • Vibration Reduction

Primary Applications

Motorcycle Suspension, Suspension Replacement, Damping Systems
