

Motorcycle Rear Shock Absorber for SUN100

This rear shock absorber is designed for SUN100 models. It features a 10.1mm installing hole, 12.1mm mounting holes, and a 328±2.0mm center distance.

Product Overview

Performance-Engineered Rear Suspension

This high-performance rear shock absorber is specifically designed for CD222 model motorcycles, providing superior damping and enhanced ride comfort. Crafted from durable, high-quality materials, the component ensures optimal vehicle stability and precise control on the road. The design incorporates precision-engineered parts and a specialized corrosion-resistant finish to ensure long-lasting reliability in various riding conditions.

Technical Specifications

Key Features

- Superior damping performance
- Enhanced ride comfort
- Precision-engineered components
- Corrosion-resistant construction

Performance Benefits

1 Optimal
Stability Level

1 High
Corrosion Resistance

Vehicle Compatibility
