

Motorcycle Rear Wheel Assembly with Spokes

Complete rear wheel assembly designed for motorcycle applications. It features a robust hub with spoke mounting points and a durable rim for optimal strength and stability.

Product Overview

High-Performance Rear Wheel Assembly

This complete motorcycle rear wheel assembly is engineered for durability and reliable performance. Featuring a robust hub with precise spoke mounting points and a high-strength rim, the wheel utilizes a radial spoke pattern to ensure optimal structural integrity and stability. It is an essential component for motorcycle applications requiring a dependable rear wheel solution.

Technical Specifications

Compatible Model	AX100
Component Type	Rear Wheel Assembly

Construction

Spoke Pattern	Radial
Key Features	Robust Hub, Radial Spoke Design, Durable Rim
