

Motorcycle Riding Gloves with Reinforced Grip

These motorcycle riding gloves offer optimal performance and protection for various riding conditions. They are constructed with a durable, abrasion-resistant outer shell, reinforced palms and fingers, and a waterproof breathable membrane.

Product Overview

Professional Riding Protection

The VMX15 motorcycle gloves are engineered for riders demanding high performance and comfort across various weather conditions. Featuring an abrasion-resistant outer shell and reinforced contact points, these gloves provide essential protection and superior grip control. Integrated climate management technologies, including a waterproof, breathable membrane and thermal lining, ensure year-round versatility for professional and enthusiast riders alike.

Ideal Usage

Motorcycle Racing • All-weather Touring
