

Motorcycle Shock Absorber (300/310mm)

This motorcycle shock absorber provides superior damping and ride comfort. It features durable construction with precision-engineered components for optimal performance and longevity.

Overview

High-Performance Damping

This motorcycle shock absorber is engineered for superior damping and enhanced ride comfort. Designed with precision components, it ensures optimal performance and longevity for various riding conditions. The unit provides excellent stability and control, making it a reliable choice for maintaining handling precision.

Technical Specifications

Shock Absorber Length

300 mm

Length Option 1

310 mm

Length Option 2

Quality Status

High Quality

Model Number

CY-9103
