

Motorcycle Shock Absorber with Remote Reservoir

This high-performance motorcycle shock absorber features a remote reservoir for enhanced damping control. The reservoir enables independent adjustment of compression and rebound damping, improving handling and ride quality.

Product Overview

High-Performance Damping Technology

This motorcycle shock absorber is engineered for riders seeking superior handling and ride quality. Featuring an external remote reservoir, it allows for precise, independent adjustment of both compression and rebound damping. Designed to withstand demanding riding conditions, the unit includes a durable coil spring and high-quality braided hose connections for reliable performance.

Technical Features

Component Specifications

- Coil spring suspension
- External reservoir for enhanced damping control
- Braided connector hose

Key Features

Remote Reservoir, Adjustable Compression, Adjustable Rebound, Braided Hose Connection

Performance

Performance Highlights

1 Independent

Compression Damping Adjustment

1 Independent

Rebound Damping Adjustment
