

Motorcycle Shock Absorber with Remote Reservoir

This motorcycle shock absorber enhances handling and ride comfort. Its remote reservoir improves heat dissipation and provides consistent damping.

Product Overview

High-Performance Damping Solution

This motorcycle shock absorber is engineered to deliver enhanced handling and superior ride comfort. Featuring an integrated remote reservoir, it ensures improved heat dissipation and consistent damping performance during demanding rides. With adjustable preload and rebound settings, riders can fine-tune the suspension to match specific road conditions and personal preferences.

Technical Specifications

Model Identifier	CY-9125
Available Lengths	200mm, 250mm

Features

Core Features

- Remote reservoir for heat dissipation
- Adjustable preload
- Adjustable rebound damping
- Durable construction
