

Motorcycle Spark Plug

This spark plug is designed for motorcycle engines. It provides reliable ignition and optimal combustion for improved engine performance.

Product Overview

High-Performance Motorcycle Spark Plug

This high-performance motorcycle spark plug is engineered to provide reliable ignition and optimal combustion efficiency. Featuring a copper core electrode for superior heat dissipation, it effectively prevents engine overheating and extends service life. The durable construction, including a 95% pure alumina insulator and nickel-plated housing, ensures excellent corrosion resistance and electrical insulation for demanding riding conditions.

Technical Specifications

Model/Part Codes	A7TC, C66
Insulator Material	95% Pure Alumina
Housing Finish	Nickel Plated
Electrode Core Material	Copper

Key Features

Construction Highlights

- Multi-ribbed insulator eliminates flash over
- Heat crimping process ensures gas-tight fit
- Inner sealing with conductive glass
- Multi-layer gaskets provide strong elasticity and reliable sealing

Performance Benefits

Corrosion Resistant • Improved Heat Dissipation • Extended Service Life • High Insulation
