

Motorcycle Speedometer Tachometer Gauge Assembly

This is a complete motorcycle gauge assembly with both a speedometer and a tachometer. The speedometer displays speed in kilometers per hour, and the tachometer measures engine speed in revolutions per minute.

Product Overview

Integrated Gauge Assembly

This comprehensive motorcycle gauge assembly combines essential instrumentation into a single, cohesive unit. It features an integrated speedometer and tachometer, providing riders with clear, real-time feedback on speed and engine performance. Designed for straightforward installation, the unit includes all necessary wiring and connectors, making it an ideal upgrade or replacement component.

Performance Metrics

Speedometer Range

120 km/h
Max Speed

Tachometer Range

12 x1000r/min
Max Engine Speed

Features

Indicator Lights	Headlight, Neutral, Turn Signals
Odometer	Integrated digital reading

Installation

Included Components

- Speedometer Gauge
- Tachometer Gauge
- Wiring Harness
- Connectors
