

Motorcycle Speedometer Tachometer Gauge Cluster

This is a complete gauge cluster for motorcycles, integrating both speedometer and tachometer functions. The speedometer measures speed in kilometers per hour, while the tachometer displays engine speed in revolutions per minute.

Product Overview

Professional Gauge Cluster Solution

This complete gauge cluster is designed specifically for TM125-5 motorcycles, providing essential diagnostic data at a glance. It integrates a clear speedometer and tachometer into a single unit, ensuring riders can monitor speed and engine performance effortlessly. The cluster is equipped with necessary wiring and connectors, facilitating a straightforward installation for maintenance or replacement needs.

Performance Metrics

Speedometer Range

160 km/h

Maximum Speed

Tachometer Range

12000 r/min

Maximum RPM

Technical Details

Indicator Lights	Neutral (N), General Indicators
Odometer Reading	8 km

Installation

Included Components

- Gauge cluster unit
- Integrated wiring harness
- Installation connectors
