

Motorcycle Speedometer with Multi-Functional Display

This motorcycle speedometer offers precise speed measurement and strong anti-jamming performance. Its design ensures waterproof, dust-proof, and vibration resistance, exceeding national standards.

Overview

High-Performance Multi-Functional Display

This motorcycle speedometer is engineered for high precision and reliability, offering robust anti-jamming capabilities for consistent performance. Designed to withstand harsh environments, the unit features superior waterproof, dust-proof, and vibration resistance that exceeds national and international IEC standards. It is compatible with a full range of motorcycle models, making it an ideal solution for diverse aftermarket and OEM requirements.

Technical Specifications

Performance Features

- High-precision measurement
- Strong anti-jamming capability
- Universal model compatibility

Durability Standards

Waterproof, Dust-proof, Vibration Resistant, IEC Standard Compliant
