

Motorcycle Spoked Wheel

This motorcycle wheel features a spoked design with a central hub. The rim is made of polished metal and accommodates a tire.

Overview

Premium Spoked Motorcycle Wheel

This high-quality motorcycle spoked wheel is engineered for durability and performance, featuring a robust central hub design and a polished metal rim. The evenly distributed spokes provide essential structural support and efficient load transfer, ensuring a smooth and reliable ride. Designed for seamless integration into motorcycle suspension and drivetrain systems, this component is an ideal choice for maintenance or restoration projects.

Design & Construction

Key Components

- Polished metal rim
- Structural spokes
- Central bearing hub

Wheel Design	Spoked
Rim Finish	Polished Metal

Technical Specifications

Hub Capabilities

Axle Compatible • Bearing Housing

Primary Function	Suspension Support, Drivetrain Integration
