

Motorcycle Sprocket Set 42T Rear 14T Front

This high-strength steel sprocket set is designed for optimal power transfer and durability. It features precision-machined teeth for smooth chain engagement and reduced wear in various motorcycle applications.

Product Overview

High-Performance Sprocket Set

This high-strength steel sprocket set is engineered for optimal power transfer and long-lasting durability in demanding motorcycle applications. Featuring precision-machined teeth, the set ensures smooth chain engagement and significantly reduced wear over time. Constructed from hardened steel, these components resist deformation under high loads and are finished with a protective coating to prevent corrosion in diverse environmental conditions.

Technical Specifications

Rear Sprocket Teeth	42 teeth
Front Sprocket Teeth	14 teeth
Material Composition	Hardened Steel
Key Features	Precision-machined, Corrosion-resistant, High-strength, Wear-resistant
