

Motorcycle Starting Battery

This motorcycle battery provides reliable starting power and is designed for long-lasting performance. It features robust construction and advanced technology for enhanced durability.

Product Overview

High-Performance Starting Battery

This motorcycle starting battery is engineered for reliability and high-capacity performance. Utilizing advanced AGM technology and a lead-calcium alloy design, it offers superior vibration resistance and consistent power delivery. The maintenance-free, anti-spill construction ensures safety and ease of use across various motorcycle models.

Technical Specifications

Voltage and Capacity

12 V

Voltage

8 Ah

Capacity

Model Identifier

YTX9L-BS

Key Features

Maintenance Type

Maintenance-Free • Sealed • Rechargeable

Core Technologies

AGM Technology, COS Technology, TTP Technology, Anti-Sulfate, Lead-Calcium Alloy

Performance

Performance Highlights

- High Cold Cranking Amps (CCA)
- Superior vibration resistance
- Excellent charge acceptance
- Anti-spill valve-regulated design
- Extended storage life
