

Motorcycle Stator Charging Coil

Motorcycle stator charging coil with copper windings on a laminated core. Includes wiring harness and connector for the motorcycle's charging system.

Product Overview

High-Efficiency Motorcycle Stator

This motorcycle stator charging coil is precision-engineered to serve as the core component of your vehicle's charging system. Featuring high-quality copper windings on a durable laminated core, it is built to provide stable and efficient power generation under various operating conditions. The assembly comes complete with a pre-installed wiring harness and connector, ensuring a reliable electrical connection and straightforward installation for professional maintenance and repair tasks.

Technical Specifications

Components Included

- Stator Assembly
- Wiring Harness
- Connector

Part Number

AM-MM-007

Construction Materials

Copper Windings, Laminated Core

Performance

Key Performance Indicators

1 High

Power Generation Efficiency
