

Motorcycle Swing Arm Rubber Bushings

High-quality rubber bushings designed for motorcycle swing arms. These bushings provide essential cushioning and vibration dampening, ensuring smooth and stable handling.

Product Overview

High-Performance Swing Arm Bushings

These motorcycle swing arm rubber bushings are precision-engineered to provide essential cushioning and vibration dampening for your vehicle's suspension system. Designed for durability and longevity, they help maintain smooth and stable handling even under demanding riding conditions. Constructed from high-quality rubber compounds, these components offer excellent resistance to wear, tear, and environmental degradation, ensuring reliable performance and enhanced rider comfort.

Technical Specifications

Key Benefits

- Vibration dampening
- Improved suspension stability
- Wear and tear resistance
- Extended service life

Compatibility	CG125
Material	High-Grade Rubber, Wear-Resistant Compound
