

Motorcycle Tail Light with License Plate Bracket

This is a motorcycle tail light assembly with an integrated license plate bracket. The assembly is designed for easy installation on motorcycles and provides both tail light and license plate mounting functionality.

Product Overview

Integrated Tail Light Assembly

This motorcycle tail light assembly features an integrated design that combines a high-visibility red lens with a robust license plate bracket. Engineered for durability and ease of installation, the black metal bracket includes elongated mounting holes for flexible positioning. It serves as a dual-purpose solution for both essential rear lighting and secure license plate mounting.
