

Motorcycle Tire with Aggressive Tread

This motorcycle tire features a robust construction and an aggressive tread pattern designed for optimal grip and performance on various terrains. The deep grooves and prominent blocks provide excellent traction in both wet and dry conditions, enhancing stability and control.

Product Overview

High-Performance All-Terrain Motorcycle Tire

This motorcycle tire features a robust construction and an aggressive tread pattern designed for optimal grip and performance on various terrains. The deep grooves and prominent blocks provide excellent traction in both wet and dry conditions, enhancing stability and control. Engineered for both off-road and on-road applications, the durable compound ensures long-lasting wear and resistance to punctures.

Performance Metrics

Application

Off-road • On-road

Traction Characteristics

Wet Surface Grip, Dry Surface Grip, Deep Groove Design, Prominent Block Pattern

Construction

Durability Highlights

- Robust construction
- Long-lasting compound
- Puncture resistant
