

Motorcycle Valves TR87, JS87C

These motorcycle valves, models TR87 and JS87C, are designed for optimal performance. They are available in various configurations, including metal steam options, ensuring reliable sealing and long-lasting use.

Product Overview

High-Performance Motorcycle Valves

These TR87 and JS87C motorcycle valves are engineered for optimal performance and long-term durability. Designed to ensure reliable sealing, these components are suitable for demanding motorcycle applications. Available in various configurations, including metal steam options, they provide a robust solution for maintenance and repair needs.

Technical Specifications

Construction

Metal Steam

Available Models

TR87, JS87C, LXV400, LSV401, LXV248, LSV251
