Product Overview

High-Performance Variable Speed Belt

Engineered for optimal power transmission, this high-performance variable speed (VS) belt provides exceptional durability and reliable performance in demanding motorcycle applications. Designed with precision, the belt offers superior grip and efficient power transfer, which helps in extending service life while reducing maintenance requirements. Its advanced construction ensures excellent resistance to wear, heat, and stretching, making it a dependable choice for various motorcycle models.

Technical Specifications

Pitch Length	669 mm
Top Width	18 mm
Included Angle	30 degree

Certifications and Compliance

Standards & Certifications	TS 16949, CNAS, IAF, TSE
