

Motorcycle Wheel Drive Chain

This motorcycle wheel drive chain is designed for optimal power transmission. It is constructed from hardened steel alloy for wear resistance and features precision engineered links for smooth operation.

Overview

High-Performance Drive Chain

This motorcycle wheel drive chain is engineered for optimal power transmission and long-lasting durability. Constructed from high-strength steel alloys, including 45Mn plates and 30CrMnTi pins, it offers superior resistance to wear and tear. Designed with precision, these links ensure smooth and efficient operation for a wide range of motorcycle models.

Technical Specifications

Available Models

- 420
- 420H
- 428
- 428H
- 520
- 520H
- 530
- 630

Material Composition

Component	Material
Plate	45Mn
Pin	30CrMnTi
Roller	20#

Available Colors

Natural, Blue, Golden

Performance & Quality

Key Features

High Strength • Heat Treated • OEM Acceptable

Performance Rating
