

# Motorcycle X-Ring Drive Chain for 600cc+ Engines

This X-ring chain is designed for motorcycles with engines above 600cc. It provides enhanced durability and reduced friction for high-performance applications.

## Product Overview

### High-Performance X-Ring Drive Chain

This premium X-ring drive chain is engineered specifically for high-performance motorcycles with engine displacements of 600cc up to 1300cc. Utilizing advanced X-ring technology, this chain provides superior wear resistance and significantly reduced friction compared to standard alternatives. Designed for demanding conditions, it ensures long-term reliability and peak power transmission for high-performance riding applications.

## Technical Specifications

Engine Displacement Compatibility	600cc - 1300cc
Seal Type	X-Ring
Model Series	520HO

## Performance Metrics

Key Performance Attributes	Reduced Friction, Enhanced Durability, Superior Wear Resistance, High Performance
