Product Overview

Industrial Coil Decoiling Solution

This motorized metal coil decoiler is engineered for continuous, precise feeding of metal sheets or strips into roll forming and stamping production lines. Designed with a robust frame and integrated electric motor drive, it ensures smooth and controlled unwinding of heavy coils. The system features adjustable guides to accommodate various coil widths, making it a versatile asset for industrial metalworking and roofing panel production.

Technical Specifications

Deployment Options

Mobile • Stationary

Operating System

Motorized (Electric/Hydraulic)

Compatible Forming Models

KR12, KR18, KR24, KR163, KR450, KR500

Performance Features

Operational Capabilities

180 deg

Locking Angle

360 deg

Max Locking Angle

Customization

Yes
