

Motorized Projection Screen with Remote Control

This motorized projection screen utilizes a tubular/synchronous motor. It is available in large screen sizes ranging from 300" to 600" and includes wired and wireless remote controls.

Product Overview

Professional Motorized Projection Screen

This motorized projection screen is engineered for large-scale viewing applications, offering massive display dimensions ranging from 300 to 600 inches. Equipped with a reliable tubular or synchronous motor, it ensures smooth and quiet operation for demanding professional environments. The system supports full customization and includes both wired and wireless remote controls, providing versatile installation and user-friendly management.
