

Mould Part for Plastic Injection Moulding

This precision-engineered mould part is designed for plastic injection moulding machinery. Its modular design allows for ease of maintenance and replacement.

Product Overview

Precision Mould Components

These precision-engineered mould parts are designed for high-performance plastic injection moulding applications. Built to withstand demanding manufacturing environments, they feature modular designs that facilitate easier maintenance and replacement. With robust construction and intricate machining, these components ensure reliability and consistency in industrial production settings.

Certifications & Standards

Quality Standards

ISO 9001:2008

Technical Capabilities

Compatible Industries

- Automotive
- Semiconductor
- IC Connector
- Lead Frame Electrical Connection
- Motor Fixed Rotor

Management Systems

ERP System Implemented • Standardized Quality Management • R&D Technical Support

Core Capabilities

2006

Established Experience Since
