

Mould Set for TV and Microwave Components

This mould set is used in the production of plastic components for televisions and microwave ovens. The set includes moulds for vent covers and corner pieces, ensuring precise dimensions.

Product Overview

Precision Mould Solutions

These high-precision moulds are engineered for the manufacturing of complex components used in televisions and microwave ovens. Built with a focus on dimensional accuracy and consistency, these sets facilitate efficient mass production for electrical appliances. The design incorporates advanced technical standards to ensure reliable performance during the injection moulding process.

Manufacturing Specifications

Management Standards

- ERP System Implementation
- Standardized Process Management
- Quality Control Systems
- Dedicated R&D and Testing Center

Certifications

ISO 9001:2008

Capabilities

Suitable Applications

- TV Components
- Microwave Components
- Automobile Parts
- Semiconductor Components
- IC Connectors
- Motor Fixed Rotors

Services Offered

Design • Manufacturing • Technical Support • Molding • Precision Spare Parts
