

Mountain Bicycle with Disc Brakes

This mountain bike has a durable frame and front suspension fork for enhanced shock absorption. It is equipped with disc brakes for reliable stopping power and high-profile wheels with knobby tires for superior traction.

Overview

Versatile Mountain Performance

This 26-inch mountain bicycle is engineered for off-road versatility and reliable performance. Featuring a lightweight aluminum alloy frame and a suspension fork with lockout, it offers a balanced ride across varied terrain. Equipped with a precision 27-speed drivetrain and responsive disc brakes, this bike is built to handle both challenging trails and recreational paths with ease.
