

# Mountain Bike Tire with Aggressive Tread

This mountain bike tire is designed for superior grip and control on varied terrain. Its durable construction enhances puncture resistance and extends its lifespan.

## Product Overview

### High-Performance Mountain Bike Tire

This high-performance mountain bike tire is engineered for superior grip and control across a wide variety of challenging terrains. Built with a durable construction, it offers enhanced puncture resistance and an extended lifespan for reliable performance. The aggressive tread pattern is specifically designed to provide optimal traction in loose dirt, mud, and rocky conditions, making it an ideal choice for both trail riding and cross-country adventures.

## General Information

Product Code	D-283
Category	Mountain tire series

## Key Features

### Terrain Compatibility

- Loose dirt
- Mud
- Rocky conditions
- Trail riding
- Cross-country

### Performance Highlights

High-Grip, Puncture Resistant, Aggressive Tread, All-Terrain
