

Mounted Abrasive Wheel Set

This set features mounted wheels designed for grinding, polishing, and shaping materials. The wheels come in various shapes and sizes suitable for use with rotary tools.

Product Overview

Versatile Mounted Abrasive Wheel Set

This comprehensive set of mounted abrasive wheels is designed for precision grinding, polishing, and shaping tasks. Featuring a diverse assortment of shapes including spheres, cones, cylinders, and discs, these tools are ideal for deburring, surface preparation, and fine polishing work. Each wheel is securely mounted on a durable steel mandrel, ensuring compatibility with standard rotary tools such as die grinders and drills.
